Plymouth (Hybrid)

Plymouth is a fast-growing full leaf type with uniform, medium-dark green leaves. The upright plant habit helps keep leaves clean and easy to harvest. Plymouth has smooth, medium-dark green leaves that are uniform in shape and size. The thick leaves are slightly-savoyed and spade-shaped. The plants are resistant to many strains of downy mildew.

- Early maturity
- Upright plant habit
- Excellent color and shape

Variety	Type	Days to Maturity from Direct Seed*	Plant Type / Leaf Shape	Leaf Color	Bolting Resistance	Disease Resistance	Uses & Remarks
Plymouth	Processing	40-45	Smooth, uniform / Erect, upright	Dark green		HR: Pfs: 1-11, 13, 15, 16	Plymouth is a moderate to fast-growing variety and has great yield potential.

Disease terminology: HR = High Resistance, IR = Intermediate Resistance. Disease code: Ao - White Rust, Pfs - Downy mildew.

* Days to Maturity are an approximation and may fluctuate due to varying planting times, location and conditions.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
