

Lettuce FOCUS

Red Tide

Red Tide is the industry standard for red leaf whole head production! This distinct variety displays deep bronze leaf margins with green midribs and base. It has a soft, butter texture and good pliability for an elevated eating experience. Red Tide has big open heads that have shown strong field tolerance to Tipburn and are adapted to most seasons with moderate bolt tolerance and quick maturity. Baby leaves are green with bronze edges, round, slightly cupped, and tapered with smooth edges. Eats well!

- Industry standard for over 20 years!
- Soft, butter texture with good pliability
- Wide adaptability

Variety	Type	Relative Maturity	Head Characteristics	Head / Leaf Color	Bolt Resistance	Uses & Remarks
Red Tide	Red Leaf	Early-mid	Round, large, slightly frilly	Green, dark red	Moderate	Red Tide has big open heads that have shown strong field tolerance to Tipburn and are adapted to most seasons with moderate bolt tolerance and quick maturity.

Disease terminology: HR = High Resistance, T = Tolerance. Disease code: BI - Downy mildew, LMV - Lettuce mosaic, TpB - Tipburn.

DISCLAIMER: Claims and other disclosed information are based on our observations and/or information from other sources. Crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, the environment, including management, and other uncontrollable factors that may alter expected performance. Statements on the reaction of varieties to a specific pathogen, pest or stress are based on evaluation under defined conditions. These reactions can be affected by changes in environmental and biological factors, especially new pathogen races, pest biotypes or vectors of disease agents. Therefore, we give no warranty, express or implied, for crop performance relative to the information given; nor do we accept any liability for any loss, direct or consequential, that may arise from any cause. Read all seed package labeling carefully as it contains terms and conditions of sale.
